

WeatherHub Observer platform

Monitoring and documentation of temperature and humidity via internet browser

The WeatherHub Observer platform is available at www.wh-observer.de and allows you to professionally monitor temperature and humidity values on your PC or laptop. If necessary, you can also have your data automatically documented.

- ✓ This platform enables you to professionally monitor the temperature and humidity
- ✓ Easy installation and operation
- ✓ Display of the recorded data as a clear diagram, adjustable to fixed time ranges - day, week or month
- ✓ Availability of the data on the server for min. 90 days
- ✓ Export of data as PDF (graphic) or as CSV file (text file)
- ✓ Automation of the monitoring possible, sending of the export data via e-mail
- ✓ Extensive possibilities for alerting via e-mail
- ✓ The WeatherHub Observer Platform is free of charge and does not require any additional usage fee or subscription costs. Costs only arise from the required hardware and, if necessary, from the Internet connection
- ✓ Usable via Windows, Apple and Linux-PCs or via Android, iOS and Windows Phone, completely browser-based and thus almost platform-independent
- ✓ Use worldwide, Internet connection required, language setting in German or English

Ideal for pharmacies, laboratories and other professional users to monitor:

refrigerators and freezers, residential, storerooms, storage rooms, cooling and cold rooms, cellars and wine cellars, server rooms, greenhouses, cigar humidors, heating and solar thermal systems, saunas, swimming pools and ponds, installations for animal husbandry (stables, terrariums, aquariums, fish farming, hatcheries, etc.)

Compatible sensors from the WeatherHub system:

 Cat. Nr.: 30.3308.02 Temperature sensor with waterproof cable sensor

 Cat. Nr.: 30.3313.02 Temperature sensor with display and waterproof cable sensor

 Cat. Nr.: 30.3312.02 Temperature humidity sensor with display

 Cat. Nr.: 30.3302.02 Temperature humidity sensor with Display and a waterproof cable sensor

Cat.Nr.: 31.4010.02

This set includes 3 professional temperature transmitters for the simultaneous measurement of the ambient temperature (inside or outside) and one additional temperature via the waterproof cable sensor.

Technical data:

Measuring range temperature:	-30 ... +60°C (-22 ... 140°F)
Cable length:	approx. 140cm
Dimensions & weight:	41 (83) x 35 (61) x 129 (135) mm, 53g
Required batteries:	6 x 1,5V AAA

Delivery content:

3 x temperature sensor with waterproof cable sensor (30.3313.02), gateway, power adaptor and network cable
